## FULL STACK WEB DEVELOPER

Full stack web developer and was educated at University of Minnesota's continue education program. Learn skills in HTML, CSS, JavaScript, JQuery, react.js, node.js, express server, and experience in mongo databases and mySQL to develop a full mern stack. For responsive web applications or mobile first design personally uses bootstrap. Love to solve new problems just like, whenever, struggling to make my first web game using react. Continuing to learn and make better games using reactJS when during personal times. Coding is very attractive, learning to code since high school, have coding classes all four years and have a little experience with JAVA.

---

## TECHNICAL SKILLS

**Languages:** HTML, CSS, JavaScript, react.js, node.js, jQuery, bootstrap

**Database:** MySQL, MongoDB

**Other:** Heroku, Github, git bash,

---

## PROJECTS

**Study buddy?** - <https://study-buddi.herokuapp.com/> | <https://github.com/Chen3337/study-buddy>  
**2019-2020**

*Full-stack web app that will help you learn new vocabularies*

- This is a mern web application that helps to remember vocabulary by playing two games, one is hangman and the other one is word tank.
- Tools used: JavaScript, Node.JS, Express, dotenv module, reactJS, 'html canvas', bootstrap, passport

**Book Search** - [booksearch-1.herokuapp.com/](https://booksearch-1.herokuapp.com/) | <https://github.com/Chen3337/Book-Search>  
**2019-2020**

*Searching for books using google apis and save them to database*

- Search for the book of your choice and can get a description, book title and a link for more information. You can save it to the for later view.
- Tools used: react.js, node.js, express, javascript, mongodb, css, bootstrap, Google book API

**Weather Search** - <https://chen3337.github.io/homework6/> | [github repo](#)  
**2019**

*A simple html application able to search for weather in a city*

- Search for the city and get its weather and some forecasts. It will ask for your location if you do not know where you are or just want to save time.
  - Tools used: html, css, bootstrap, javascript. Weather API, location API
  - This is one of the early projects I made.
